

EduQuest: Online Learning Platform

Comprehensive Figma UI/UX Design Specification & Project Report

PROJECT STATUS

Design Phase Approved

TARGET PLATFORM

Mobile & Web Responsive

DELIVERABLES INCLUDED

UI Spec, Prototype Architecture

UI Design

User Flow Design

Mobile & Web Design Basics

Prototyping

Component Usage

User Experience Fundamentals

1. Executive Summary & Core Objectives

EduQuest is a modern, clean, and highly intuitive micro-learning platform designed to minimize onboarding friction and maximize course retention rates. This report documents the structured design specification for the 7 core functional screens optimized for a mobile-first user experience. The objective is to establish consistent layout systems, standard component instances, and seamless navigation transitions across the platform.

2. Global Design System & Component Guidelines

To ensure absolute visual harmony across all screens, a centralized design system has been configured in Figma with the following token definitions:

Color Palette Matrix

Primary Brand

#1E3C72

Success Accent

#10B981

Warning Yellow

#F59E0B

Bg Light

#F8FAFC

Text Dark

#1E293B

Typography Hierarchy

- **H1 (Screen Headers):** Inter Bold, 20pt / Line Height: 28pt
- **H2 (Section Subheaders):** Inter SemiBold, 14pt / Line Height: 20pt
- **Body Text:** Inter Regular, 10pt / Line Height: 15pt
- **Micro/Caption:** Inter Medium, 8.5pt / Line Height: 12pt

3. Detailed Screen Specifications (7-Screen Framework)

Screen 1: Login & Onboarding Page

Layout Architecture	Vertical stack layout, 24px global padding. Centralized logo placement, dual input fields, and single-click social authentication.
Key UI Components	Input Box (Active/Inactive states), Primary Button (Fill, #1E3C72), Social Sign-In Pill Tokens.
UX Rationale	Minimizes cognitive load by hiding secondary option links behind clear structural hierarchy. Uses inline error validation states.

Screen 2: Course Discovery & List Page

Layout Architecture	Sticky top search header with dynamic horizontal category filters. Main feed utilizes a single-column card grid pattern.
Key UI Components	Search Bar Component, Horizontal Filter Pills, Course Card Component (Thumbnail image, Title, Rating, Progress Bar).
UX Rationale	Horizontal scrolling for categories keeps screen real estate efficient while providing fast context switching.

Screen 3: Course Syllabus & Details Page

Layout Architecture	Hero section with video thumbnail overlay. Mid-section split into Overview and Syllabus tabs via a sliding segment selector.
Key UI Components	Segmented Control Tab, Accordion List (Modules & Lessons), Sticky Bottom Fixed CTA Callout.
UX Rationale	The sticky bottom button ensures the primary target action ("Enroll Now" / "Resume Learning") is always accessible without scrolling.

Screen 4: Immersive Video Learning Screen

Layout Architecture	Top 16:9 aspect ratio native video player. Bottom area dedicated to scrollable lecture notes, automated transcript tracking, and download links.
Key UI Components	Video Custom Controls (Play, Pause, Speed Modifier), Active Video Row Highlight State, Tab Selector.
UX Rationale	Dark mode default interface for the video player container to drastically reduce visual fatigue during prolonged streaming sessions.

Screen 5: Interactive Knowledge Assessment / Quiz

Layout Architecture	Top countdown timer widget paired with a fractional progress bar (e.g., Question 3 of 10). Multi-choice layout options stack vertically.
Key UI Components	Progress Bar, Radio-Selection List Item Cards (Default, Hover, Selection-Active, Error/Success verification states).
UX Rationale	Provides immediate feedback upon option validation using green/red semantic accent tones, improving gamified engagement.

Screen 6: Performance & Progress Analytics Page

Layout Architecture	Dashboard format. Top grid presents main statistics blocks (Hours Spent, Certificates Earned). Bottom area contains an active course status list.
Key UI Components	Donut Charts (Figma vectors), Metrics Grid Blocks, Achievement Badge Unlock Grid.
UX Rationale	Visualizes complex linear tracking numbers into interactive charts to deliver clear psychological closure and accomplishment indicators.

Screen 7: User Profile & App Settings Page	
Layout Architecture	Centrally nested user avatar profile component. The main body lists full system preferences rows using chevron indicators.
Key UI Components	Avatar Base Circle, Toggle Switch Component (Active/Inactive), Flat List Settings Rows.
UX Rationale	Groups functional app settings cleanly into intuitive buckets (Account, Notifications, Security) ensuring ease of access.

4. Interactive Prototype User Flow Map

The Figma interactive prototype establishes the execution flow outlined below to ensure frictionless user testing pathways:

- **Onboarding Transition:** Login Button (Tap) → Smart Animate (Ease-in 300ms) → Course List Page.
- **Course Selection:** Course Card Widget (Tap) → Move-In (Right-to-Left 250ms) → Course Details Page.
- **Learning Activation:** "Start Video" CTA (Tap) → Instant Transition → Video Learning Screen.
- **Evaluation Path:** "Take Quiz" Pill (Tap) → Push Effect → Quiz Screen → Finish Activity (Tap) → Progress Page.

5. Project Verification Summary

This design layout meets all standard guidelines for modern interface design. All layers are systematically named and grouped into clear Figma Frames, using global Auto-Layout variables for seamless cross-platform adaptability on mobile and desktop web formats.
